APPLICATION DEPLOYMENT

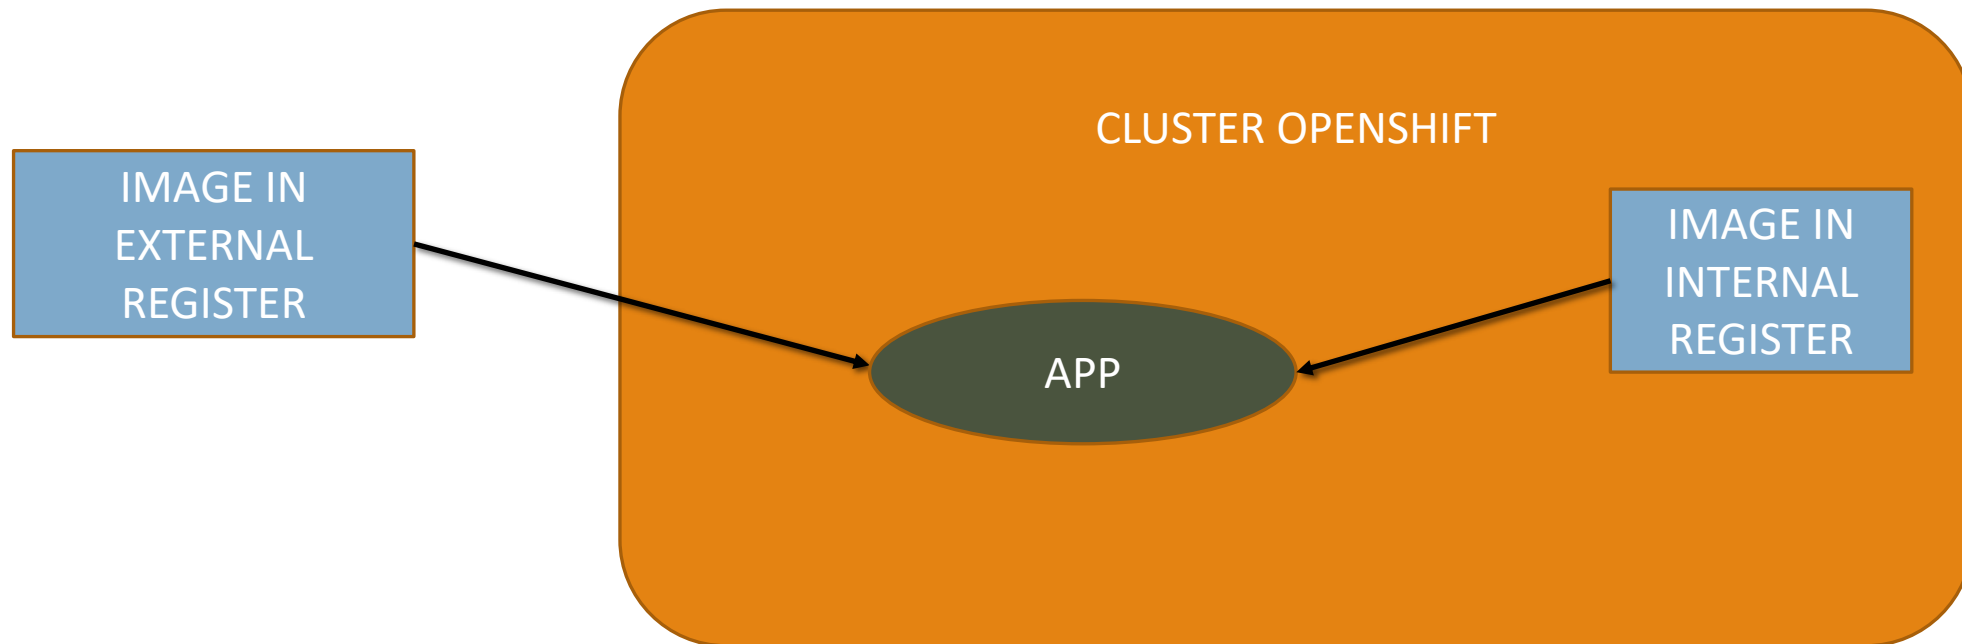

Openshift from scratch

- ❑ Applications can be deployed in OpenShift in a variety of ways, both from the web console and from the oc client.
- ❑ The main methods for deploying an application are:
 - ❑ Deploy an app from an existing image
 - ❑ Build and deploy an application from Source Code contained in a Git repository and using Source-to-image builder (S2I)
 - ❑ Build and deploy an application from Source Code contained in a Git repository and using a Dockerfile
 - ❑ From templates
